

Reg. No. TáTK/235/1(2026)

Dean's Instruction No. 1/2026
Regulation on Students' Use of Artificial Intelligence at the Faculty of Social Sciences of Eötvös Loránd University

This Instruction, in accordance with Rector's Instruction 4/2025 (X.28.) on the Use of Artificial Intelligence in Education at Eötvös Loránd University, regulates below the use of artificial intelligence (AI) by students of the Faculty of Social Sciences of Eötvös Loránd University.

At the Faculty of Social Sciences of Eötvös Loránd University, the use of AI applications is permitted solely in support of educational objectives and must uphold academic integrity and data security, in accordance with university and faculty regulations and guidelines.

In course requirements, lecturers may define when and how AI tools may be used by students for specific assignments and set requirements for documenting such use. If the lecturer does not provide specific provisions regarding the use of AI tools in connection with the fulfillment of course requirements, the student may decide whether or not to make use of AI tools for completing the assignment. The compliant-use of the selected tool is in all cases the responsibility of the student. For the sake of transparency, **the use of AI must be documented in all cases.** : If the lecturer does not specify the required form of documentation, Annex No. 3 of the Thesis Regulations—Summary Table on the Use of Artificial Intelligence—shall be used as guidance

With regard to the thesis, the Faculty Regulation entitled *Thesis Requirements: Formal and Substantive Requirements, as well as the Indication of Sources Used and the Method of Referencing* shall prevail.

Presenting and submitting AI-generated content as one's own intellectual work in any form of student assignment is prohibited.

The author bears responsibility for the content of any material prepared using AI-generated content (including its accuracy and any errors).

When using AI-based tools, the student is required — in accordance with Section 4.3 of the Rector's Instruction — to assess data protection risks. During the use of AI tools, the student must comply with applicable data protection and data management legislation (GDPR) as well as the University's Data Protection Regulations.

AI tools may not be used for:

- processing or sharing personal data
- processing or sharing confidential information
- processing documents containing sensitive data
- processing interview transcripts
- processing documents containing business secrets
- processing documents protected by copyright (e.g., lecture notes or course materials written by lecturers)

The use of any AI tool is prohibited in all cases where it may infringe upon the rights of third parties and/or entail legal liability.

Any use of AI tools must be indicated within the text, either in an in-text citation or in a footnote related to the relevant passage, in accordance with the referencing styles used at the Faculty (APA, Chicago, Harvard).
